Job Summary:

Wytec LLC, a high-growth manufacturing company serving the Biomedical Research community is currently seeking a professional, hard-working, and reliable, Manufacturing Lean Leader to join our team.

The ideal candidate will thrive in a fast paced, hard-working environment with the potential to grow within the company. This position will play a critical role in establishing and implementing lean principles and practices, cultivating a lean culture, leading the organization through training, adoption of practices and sustaining overall ownership of lean within the manufacturing organization. This position will require the candidate to spend a significant amount of time on the floor conducting studies, taking measurements, problem solving and serving as a change agent.

Essential Duties:

- Educate and train the lean principles throughout the mfg. process
- Transform the mfg. operation to a new way of thinking and sustain lean practices
- Cultivate lean as the way of thinking in the manufacturing organization
- Organize workspaces for optimum productivity within boundaries of facility
- Time study (measure) each critical process within the operation, developing countermeasures and opportunities
- Develop metrics to indicate current state of operation and revised post implementation
- Problem solving; process mapping, gap analysis and developing process metrics
- Drive a focus on continuous improvement throughout the mfg. operation
- Ongoing training of manufacturing teams in lean methodologies and SOPs

Required Qualifications:

- 2-year degree (or greater) in manufacturing or related program
- 2 + years of practical experience in a lean manufacturing environment
- 2 + years of experience facilitating safety practices in a manufacturing environment
- Strong written and verbal communication skills

- Fluency with MS office, process mapping and time study applications
- Successful completion of pre-employment screening
