Our Company: Wytec LLC, a high-growth manufacturing company serving the Biomedical Research community is currently seeking a professional, hard-working and reliable, full-time Production Supervisor to join our team. We will provide on the job training for the right candidate.

We are currently growing our team in North Sioux City, South Dakota. At Wytec, we value teammates that are honest, detail-oriented, customer-oriented problem solvers. Together, we cultivate a startup mentality and culture that encourages our team to take calculated risks, work collaboratively, and take the initiative to identify and solve problems across our business.

Job Summary:

Wytec is currently seeking a professional, hard-working, and reliable full-time Production Supervisor to join our team. The North Sioux City (NSC) Production Supervisor has day-to-day responsibility for the operation of multiple shifts, management and development of operational staff members, and delivery of manufacturing key process indicators (KPI's). This includes promoting teamwork throughout the organization, effectively communicating mfg. requirements, listening to employees, ensuring compliance to safety, quality and manufacturing operating procedures. Ultimately, the Production Supervisor is a critical part of a cross-functional team striving to achieve exceptional client satisfaction.

Essential Duties:

- Manage and develop cross functional / shift team members.
- Drive safety in every aspect of the operation; across inbound, product processing, and final shipment.
- Ensure all quality standards are met and work with the quality department on internal audits.
- Work in conjunction with production schedulers to staff and manage work orders.
- Implement and sustain lean management principles throughout the operation.
- Partner with human resources to ensure staffing aligns with production requirements.
- Promote cross functional collaboration and training among team members.
- Manage continuous improvement programs, processes, and methods to improve safety, quality, productivity, and overall client satisfaction.
- Ensure operational key performance indicators (KPIs) are regularly updated and tracked
- Collaborate with engineering and quality to achieve maximum utilization of machinery.
- Other duties as assigned.

Required Qualifications:

- 4-year business degree in manufacturing-related field or equivalent experience.

- 5-10 years managing a multi shift high volume manufacturing team.
- Strong communication and analytical skills.
- Experience working within an ISO-certified operating environment.
- Strong problem-solving skills, ideally with a lean or Six Sigma background.
- Ability to multitask, manage people, processes and projects.
- Experience managing a diverse team with multiple backgrounds and talents.

Employment Type: Full-Time, Exempt (salaried position)

Benefits Offered: Paid Time Off, Paid Holidays, Medical, Dental and Group Vision Insurance, 401k with Company match, fully equipped fitness facility, casual work environment and excellent career growth
